

Table 2 Lethal time values for 50 % (LT₅₀) and 90 % (LT₉₀) mortality of the mosquito larvae fed with *Nannochloropsis oceanica*.

LT ₅₀ (Days)	LT ₉₀ (Days)	χ^2 [df = 5]	<i>p</i>	Intercept	Slope	% of undigested cells
4.98 (3.65 - 6.31)	6.14 (4.56 - 7.18)	51.206	0.001 ^a	-3.105	7.337	91.23

^aSince the significance level is less than 0.150, a heterogeneity factor is used in the calculation of confidence limits.
