

Table 4 Median lethal time (LT<sub>50</sub>) of extract mixture, *Z. officinale* and *M. oleifera*

Extracts	Slope ( $\pm$ SE)	Intercept ( $\pm$ SE)	$\chi^2$	df	LT <sub>50</sub> (95% FL)
<i>Zingiber officinale</i>	0.02 (0.03)	-1.01 (0.23)	20.77	18	64.61 (52.64-78.46)
<i>Moringa oleifera</i>	0.01 (0.01)	-0.82 (0.23)	11.77	18	76.44 (59.83-112.86)
Mixture	0.02 (0.01)	-0.73 (0.51)	0.01	2	36.36 (-67.53-57.66)

Note:  $\chi^2$ : Chi-square; SE: Standard error; FL: Fiducial limits; LT: Lethal time; df: degree of freedom
