

Table 4 Showing the final mean of mortality percentage in each treated group that was calculated on termination of treatment

Parameter Group	Total No	Mean Length (cm)	Mean Weight (gm)	Dose	Duration of Exposure	Mean No of Mortality	Mean % Mortality
First Week							
G1 control (-)	30	6.98	7.43	-	-	0	0%
G2 control (+)	30	7.68	7.77	-	-	1	3.33%
G3 Treated	30	7.31	5.13	100 PPm	30 min	1	3.33%
G4 Treated	30	8.05	6.33	200 PPm	30 min	0	0%
Second Week							
G1 control (-)	30	6.98	7.43	-	-	0	0%
G2 control (+)	30	7.68	7.77	-	-	3	10%
G3 Treated	30	7.31	5.13	100 PPm	30 min	0	0%
G4 Treated	30	8.05	6.33	200 PPm	30 min	0	0%

Note: Percents within the same column sharing the same subscript are not significantly different at  $p < 0.05$  in the two-sided test Z-test. Tests are adjusted for all pairwise comparisons using the Bonferroni correction
