

Table 1. Colonial morphology of bacteria isolated from *Gracilaria verrucosa* infected with ice-ice diseases.

Isolates	Media	Colonial morphology			
		Shape	Margin	Elevation	Colour
<i>Gracilaria verrucosa</i> 1 (Gv.1)	TSA	Irregular	Entire	Convex	White
<i>Gracilaria verrucosa</i> 2 (Gv.2)	TSA	Circular	Serrate	Convex	Yellow
<i>Gracilaria verrucosa</i> 3 (Gv.3)	TSA	Circular	Serrate	Convex	Cream
<i>Gracilaria verrucosa</i> 4 (Gv.4)	TSA	Circular	Serrate	Flat	Yellow
<i>Gracilaria verrucosa</i> 5 (Gv.5)	TSA	Circular	Entire	Flat	White
<i>Gracilaria verrucosa</i> 6 (Gv.6)	TSA	Circular	Entire	Convex	Orange
<i>Gracilaria verrucosa</i> 7 (Gv.7)	TCBS	Circular	Entire	Convex	Yellow
<i>Gracilaria verrucosa</i> 8 (Gv.8)	TCBS	Circular	Entire	Convex	Yellow
